PROFESSIONAL SUMMARY

Master of Information Technology student at Charles Darwin University with practical mobile/web development, debugging, API/JSON integration and application-testing experience. Completed a Flutter/Dart internship at DVIBIT and is currently contributing to a full-stack Student Internship & Job Application Tracker. Interested in graduate IT, software development, application support and digital roles.

TECHNICAL SKILLS

Development	Flutter, Dart, HTML/CSS, JavaScript fundamentals, React.js and Node.js/Express project exposure, REST APIs, JSON
Testing & Data	Manual/functional/UI testing, regression concepts, defect reproduction, Postman fundamentals, SQL fundamentals, Excel, Power BI fundamentals
Databases & Tools	MongoDB/Mongoose, Git, GitHub, Jira, Figma, VS Code, Postman, Microsoft Office
Professional	Problem solving, communication, teamwork, time management, adaptability and documentation

PROFESSIONAL EXPERIENCE

IT Work Placement Intern | DVIBIT, Surat | Jul 2026 - Present

- Contributing to a Student Internship & Job Application Tracker covering application records, interviews, reminders, notes and status history.
- Documented requirements/user stories and planned the React/Vite, Node/Express, MongoDB, JWT/bcrypt and Tailwind architecture.
- Created responsive Figma prototypes and designed the initial database entities, REST API routes and access-control approach.
- Uses GitHub/Jira for task organisation and is preparing Postman and Jest/Supertest-based testing for implementation.

Flutter Developer Intern | DVIBIT, Surat | Feb 2023 - May 2023

- Built and customised Flutter/Dart UI screens and assisted with mobile application feature development.
- Debugged issues, validated behaviour after changes and supported application performance improvements.
- Integrated basic REST APIs/JSON and used Git/GitHub for collaborative version control.

SELECTED PROJECTS

Student Internship & Job Application Tracker: Current work-placement project covering requirements, responsive UI/UX, data modelling, API planning and testing preparation.

Dr. Direct: Android application - contributed to front-end work and application testing for patient-facing functionality.

My Society: Flutter application - contributed to design, front-end development and testing for society/building management workflows.
